

This year , ISA decided and authorized a first ever - by invitation - 5 days - entrepreneurial space workshop to be a precursor to the 14th International Ilan Ramon Space Conference which will take place in Tel Aviv Jan 29th 2019. A kind of accelerator. The intent of this workshop on the 28th is to stimulate local aspiring entrepreneurs to start in Space.

We recruited some 40 Israeli participants for this workshop with an Israel Innovation Authority SME grant that each emerging idea would be able to win (according to objective measures and we are honored to create a partnership with ESA.

So the idea behind the concept is to give these young entrepreneurs some tools about Space & Business.

That's why we asked you to join us on the 28th to give them a special inspirational talk for some 30 minutes.

Monday - 28/01/19 - Master Classes - WORKSHOP
